**EXAMINER'S AMENDMENT AND REASONS FOR ALLOWANCE**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited on the PTO-892 each disclose a recording pulse generating apparatus or method.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In the specification, page 1, between the title and "Technical Field", the following paragraph was inserted:

-- This application is a 371 of PCT/JP05/06148, filed March 30, 2005. --.

The following is an examiner's statement of reasons for allowance: the prior art of record considered as a whole fails to teach or suggest a recording pulse generating apparatus or method for generating recording pulse signals having pulse widths corresponding to pits having various lengths, comprising: a first pulse generating process or device for generating the recording pulse signal so that an amplitude of the recording pulse signal corresponding to a pit having length less than a preset length changes from a first amplitude which is an amplitude of front end of the recording pulse signal to a second amplitude which is lower than the first amplitude and is an amplitude of rear end of the recording pulse signal; **a second pulse generating process or device for generating the recording pulse signal so that an amplitude of the recording pulse signal corresponding to a pit having a length equal to or longer than the preset length changes from a third amplitude which is an amplitude of front end of the recording pulse signal to a fourth amplitude lower than the third amplitude, and further changes to a fifth amplitude which is higher than the fourth amplitude and is an amplitude of rear end of the recording pulse signal, wherein in the first and second pulse generating processes or devices, the recording pulse signals are generated so that the first and third amplitudes become equal to each other.** (bold language emphasized)

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
